DESCRIPTORS	Annotated Bibliographies; *Educational Development; Educational Planning; *Educational Policy; *Educational Research; Educational Resources; Elementary Secondary Education; Higher Education; Special Education; *Vocational Education
IDENTIFIERS	*Spain

ABSTRACT

Sources for studying the educational system of Spain and other European countries are provided in this bibliography of documents produced throughout Europe. Case studies and research reports on the problems of transition from school to work are included in section one. Data were gathered from Spain, Greece, Portugal, Belgium, the Federal Republic of Germany, France, and the Nordic countries. Documents in section two cover several concerns of higher educational institutions such as applicability of university research and reform of the system of higher education. Data were reported from Spain, Austria, the Federal Republic of Germany, France, Malta, the Netherlands, Norway, Switzerland, Sweden, and the United Kingdom. Data on special education problems and policies in Spain are found in the third section. The fourth section concerns the vocational training system in Spain. The last section consists of documents dealing with education policies in Spanish primary and secondary school systems. Experimental designs for secondary education and analyses of high school preparation for university training are included. (SM)
